This project will encourage key UK and Chinese universities to change the ways they share pharmacoeconomics knowledge by developing a long-term educational collaborative that promotes improvements in patient and economic well-being.
Our keynote international guest speaker at the five-day workshop will be Dr Chris Carswell, Editor-in-Chief of PharmacoEconomics and President of the ISPOR New Zealand Chapter, Auckland.
PharmacoEconomics
Knowledge exchange with 30 health care practitioners, managers and economists in China
Five-day knowledge transfer workshop in China provided by the five collaborating universities
Practical workshop sessions given by Carol Beaver, Professor in Health Systems and Economics
Support for attendees to use pharmacoeconomics in their work and decision-making
Knowledge provided online via learning chat rooms, social media and news updates

UK and Chinese experts work for the health benefits of patients

Project: UK–China Health and Economy Partnership (UK-CHEP)

Project Type: International Collaboration / Masterclass

Date: March 2021

Summary

This archived record documents the UK–China Health and Economy Partnership (UK-CHEP) masterclass held at Zhejiang University in March 2021. The programme brought together leading experts from the United Kingdom and China to explore the economic evaluation of diagnostic testing and screening, strengthening international collaboration in health economics and health technology assessment. The initiative formed part of the long-term UK-CHEP partnership led by Professor Darrin Baines and collaborating universities in both countries.

UK and Chinese experts work for the health benefits of patients

International experts in the economics of health care have gathered to explore the cost-effectiveness of using screening and diagnostics tools for the benefit of patients in the UK and China.

A masterclass was held at Zhejiang University on the 23rd and 24th March 2021, which explored the key economic arguments surrounding the implementation of diagnostic tools and screening programmes with practical examples of screening for lung cancer illustrating the talks.

Presentations were given by leading experts in diagnostic and screening evaluation methodologies. The sessions were chaired by the UK-CHEP Partnership Leads, Professors Hengjin Dong (Zhejiang University) and Chris Bojke (University of Leeds).

UK-CHEP supports participating universities so they can work together to create significant impact for both the British and Chinese people and economy by engaging in long-term projects and knowledge collaborations that generate new expertise in health economics and health policy.

UK-CHEP Is designed to:

- Help build mutual understanding and deepen and broaden collaboration between participating universities by sharing research and educational opportunities that help deliver the goals of China's "Double First Class" programme.
- Promote international collaboration between world-class academics in China and the UK uninterrupted by the COVID-19 pandemic.

Valuing Health Outcomes for Health Technology Assessment

Project: UK–China Health and Economy Partnership (UK-CHEP)

Workshop Dates: 17–18 November 2020

Host: University of Sheffield

Summary

This archived record documents the UK–China Health and Economy Partnership workshop **"Valuing Health Outcomes for Health Technology Assessment."** The workshop brought together researchers from leading universities in the United Kingdom and China to advance collaboration in health economics, health technology assessment, and the measurement and valuation of health outcomes. Professor Darrin Baines served as the coordinating lead of the UK–China Health and Economy Partnership and contributed to the programme.

UK–China partnership event promotes new expertise and techniques in health economics

Project: UK–China Health and Economy Partnership (UK-CHEP)

Project Type: International Masterclass / Knowledge Transfer Event

Date: 17–18 November 2020

Summary

This archived record documents the UK–China Health and Economy Partnership (UK-CHEP) masterclass held at Shandong University in November 2020. The event brought together academic leaders from the United Kingdom and China to strengthen collaboration in health economics and health technology assessment (HTA). Professor Darrin Baines introduced the partnership and highlighted its role in building long-term research, education, and knowledge transfer between participating universities. The programme was supported by the British Council and GlaxoSmithKline (GSK).

UK-China partnership event promotes new expertise and techniques in health economics

A masterclass was held at Shandong University on 17 and 18 November 2020, overseen by the British Council, with the aim of creating measurable benefits for Chinese patients and the economy by generating new health economics expertise.

The UK-China Health and Economy Partnership (UK-CHEP) promotes long-term collaboration between UK and Chinese universities by focusing on the economics of healthcare for the mutual benefit of the two countries. GlaxoSmithKline (GSK) assisted in the development of the partnership and has provided funding to ensure its success.

UK-CHEP Masterclass 2020

Professor Darrin Baines from Bournemouth University gave an introduction to the partnership. Academic leads from the University of Sheffield, Leeds University, University of York and three Chinese universities - Zhejiang University, Fudan University and Shandong University - joined the masterclass.

The event involved knowledge transfer of research-led technical advice that supports the reform of Chinese Health Technology Assessment (HTA) processes and builds in-country capacity in health economics.

The masterclass will:

- Support UK-CHEP participating universities so they can work together to create significant impact for both the British and Chinese people and economy by engaging in long-term projects and knowledge collaborations that generate new expertise in health economics and health policy, and
- Help build mutual understanding and deepen and broaden collaboration between participating universities by sharing research and educational opportunities that help deliver the goals of China's "Double First Class" programme.
- Promote international collaboration between world-class academics in China and the UK uninterrupted by the COVID-19 pandemic

Professor Darrin Baines, Professor in Health Economics at Bournemouth University, said: "This masterclass will help secure significant impact upon health and economic outcomes by improving patient quality of life through better and faster access to cost-effective medicines and promoting world-class research and education in keeping with China's 'Double First Class' programme."

Professor Simon Dixon, Professor of Health Economics at the University of Sheffield, said: "I am grateful that colleagues in the UK and China have come together to deliver an excellent masterclass programme at Shandong University and online. I am confident this will mark the start of lasting research and teaching collaborations. I also thank GSK for their contributions to the partnership."

Professor Sun Qiang, Professor of Health Economics at Shandong University, said: "UK-China Partners overcome COVID-19 pandemic and work together to deliver this masterclass programme again to strengthen the development of health economics and evaluation in China. I believe this work will also contribute to the overall collaboration between UK and China universities."

This partnership is led by Bournemouth University and was originally launched in Jinan, Shandong province in November 2017 by GSK.

UK and Chinese experts work for the health benefits of patients

Project: UK–China Health and Economy Partnership (UK-CHEP)

Project Type: International Masterclass / Knowledge Transfer Event

Date: 23–24 March 2021

Summary

This archived record documents a UK–China Health and Economy Partnership (UK-CHEP) masterclass held at Zhejiang University in March 2021. The programme brought together leading experts from the United Kingdom and China to examine the health economics of diagnostic testing and screening while strengthening international collaboration in health economics and health technology assessment (HTA). Professor Darrin Baines contributed to the programme as the coordinating lead of the UK–China Health and Economy Partnership.

POLICY AND METHODS FOR HEALTH TECHNOLOGY ASSESSMENT OF DRUGS AND MEDICAL DEVICES

A UK-China Health and Economy Partnership Workshop

3rd-4th September 2021

UKCHEP logo

The UK-China Health and Economy Partnership is a novel knowledge transfer partnership that will promote long-term collaboration between Bournemouth University, University of York, University of Sheffield and University of Leeds in the UK and Fudan University, Shandong University and Zhejiang University in China.

The partnership aims to create long-term, sustainable collaboration in health economics, which will give UK and Chinese academics the means to work together on world-class educational and research outcomes that would otherwise not be possible working in isolation.

This partnership was originally launched in Jinan, Shandong province in November 2017 by Bournemouth University. British Council has funded an extension to the partnership for a further two years from January 2019 with sponsorship from GlaxoSmithKline.

This workshpp is one of a series of three workshops held by the UKCHEP universities, please see the Sheffield-Shandong and Leeds-Zhejiang workshops.

York–Fudan Workshop on Health Technology Assessment

Project: UK–China Health and Economy Partnership (UK-CHEP)

Project Type: International Workshop

Date: 3–4 September 2021

Partner Institutions: University of York and Fudan University

Introducing Charmain Lyons, UK-China Health and Economy Partnership Project Coordinator

Institution: Bournemouth University

Record Type: Project Administration

Summary

This archived record introduces Charmain Lyons, Project Coordinator for the UK–China Health and Economy Partnership (UK-CHEP). It documents the administrative and operational support provided for the partnership, including coordination between UK and Chinese universities, project stakeholders, funding partners, and the preparation of project reporting and governance documentation.

Archived Record

https://web.archive.org/web/20260403205117/https://blogs.bournemouth.ac.uk/research/2015/01/28/introducing-charmain-lyons-project-administrator-for-the-faculty-of-management/

Archived Page Screenshot

Charmain supports the Faculty of Management UK-CHEP project lead by providing hands-on management of the administration and coordination of the UK-CHEP project initiatives, and liaises with the UK Partners (Leeds, Sheffield, York) university professors, UK/China funders and the stakeholders.

Charmain also schedules, chairs and participates on video/teleconference calls with the stakeholders, funders and UK partners. Minute takes and produces action logs and monitors the project delivery progress, ensuring that all actions and decisions are clearly recorded, communicated and completed. Charmain is also responsible for collating and preparing the project quarterly progress report content.

Currently, Charmain has been working at BU since 2010, and excluding a one year E-Commerce Site Administrator secondment in Marketing & Communications, has worked in RDS. Before Charmain joined BU, she worked in both the private and public sector, her roles included FE college management; Business Development; Client Services; Project Management, Staff Training and HR. Charmain also worked as a UK/International Events Manager which enabled her to live and work in European cities including Monte Carlo and also in the United States.

Outside of BU, Charmain is a Adult Education support tutor and Learning Support Assistant to English, ICT, ESOL and Mathematics learners.
